### PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of production experience shipping 10+ apps across sports tech, e-commerce, AI, and enterprise SaaS. Led frontend architecture as a sole developer, scaled teams, and deployed end-to-end solutions using Flutter, React, Next.js, Angular, FastAPI, and MongoDB. Currently building enterprise document intelligence at Botminds.ai while independently creating AI-powered video automation pipelines published on YouTube.

---

### FEATURED PROJECT

#### Story-to-Video AI Pipeline

*Fully automated content creation — from text prompt to published YouTube video*

- Built an end-to-end pipeline: **Gemma 3** generates stories, **Kokoro** synthesizes voiceover, **Whisper** creates timed subtitles, **Stable Diffusion** generates scene visuals, **MoviePy** composes the final video.
- Deployed on **FastAPI** with scheduled automation, publishing content to YouTube via **GCS + YouTube Data API** — fully hands-free after trigger.
- Live channel: [youtube.com/@RiseupNarratives](https://youtube.com/@RiseupNarratives)

---

### PROFESSIONAL EXPERIENCE

#### Full Stack Developer (Contract)

Aug 2025 – Present

*Botminds.ai — Enterprise AI Document Intelligence*

- Built enterprise-grade document editing UI in **Angular**, including a Word-like rich text editor — the platform's most technically challenging frontend feature.
- Integrated **C# backend** APIs for document processing workflows, enabling end-to-end intelligent extraction pipelines.
- Implemented BMX file management with **Gitia version control**, enabling seamless project migration across subscriptions with full configuration preservation.
- Accelerated feature delivery by **40%** through strategic use of AI coding assistants, reducing complex issue resolution time from days to hours.

#### Full Stack Developer (Contract)

Jul 2024 – Jul 2025

*IVAM Global Solutions — Multi-Client Enterprise Consulting*

- **KriyaLearn**: Developed admin console and learning portal in **Next.js** within an agile team, delivering dashboard analytics and student progress tracking.
- **OpsVerse**: Designed a real-time AI-powered deployment assistant and chat interface in **React**, reducing deployment troubleshooting time for DevOps teams.
- **PlanB Consulting**: Migrated legacy **SharePoint** content to modern React apps; built interactive **D3.js** data visualizations and integrated Azure Container Instances + CosmosDB.
- Maintained code quality across **3 concurrent client projects** while collaborating on CI/CD using **Azure Pipelines**.

#### Full Stack Developer

Dec 2023 – Jul 2024

*Soulocal Technologies — E-Commerce Platform*

- Served as the **sole frontend developer** across 3 Flutter mobile apps (customer, store, delivery) and a Next.js billing web app — owning the entire UI/UX architecture.

- Designed and built the billing backend with **FastAPI + MongoDB**, deployed on **AWS EC2 & Amplify**, handling real-time order processing.
- Integrated **Razorpay** payments, **Firebase Realtime DB** for live updates, and **CleverTap** for heatmaps, crash logs, and user funnel analytics.

**Software Development Engineer II**

Aug 2021 – Nov 2023

*Sporfy Indian Pvt. Ltd. — Sports Technology*

- Engineered **10+ live scoring platforms** (cricket, football, badminton) using Flutter, Next.js, Firebase, and Google Maps — serving thousands of concurrent users.
- Led a **3-member pod**, owning sprint planning, deployment pipelines, code reviews, and app performance monitoring across mobile and web.
- Managed end-to-end **Play Store & App Store** release cycles, ensuring compliance, performance benchmarks, and zero-downtime deployments.
- Recognized with **Quarterly Performance Award** and promoted to SDE-II for consistently exceeding delivery targets and mentoring junior developers.

**TECHNICAL SKILLS**

---

|                               |                                                                                      |
|-------------------------------|--------------------------------------------------------------------------------------|
| <b>Frontend</b>               | Flutter, React, Next.js, Angular, TypeScript, JavaScript, Redux, TailwindCSS, D3.js  |
| <b>Backend &amp; Database</b> | FastAPI, Python, C#, MongoDB, Firebase Realtime DB, Supabase, Redis, CosmosDB        |
| <b>DevOps &amp; Cloud</b>     | AWS EC2, Amplify, Azure DevOps, Azure Container Instances, Firebase CLI, Vercel, GCS |
| <b>AI &amp; Automation</b>    | Whisper, Kokoro TTS, Stable Diffusion, Gemma 3, MoviePy                              |
| <b>Publishing</b>             | Play Store, App Store, Android Studio, Xcode, Render, HuggingFace                    |

**EDUCATION**

---

**B.Tech in Information Technology**

June 2018 – June 2022

Dr. N.G.P Institute of Technology, Coimbatore
