PROFESSIONAL SUMMARY

Frontend-focused developer with 4+ years building responsive, scalable web applications in React.js, Next.js, Angular, JavaScript and TypeScript. Hands-on with component-driven development, state management (Redux, Context API), REST API integration, JWT/OAuth authentication and frontend performance optimization. Practical working knowledge of Node.js and backend API concepts (routing, middleware, request/response handling) for full-stack troubleshooting. Experienced in Git, Azure DevOps CI/CD and agile delivery across enterprise SaaS, EdTech and e-commerce products.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Context API, React Hooks, TailwindCSS, D3.js, responsive & accessible UI, cross-browser compatibility

Backend & APIs: Node.js, REST API design & integration, Axios/Fetch, JWT, OAuth2, FastAPI, Python, C# (.NET APIs), MongoDB, CosmosDB, Firebase Realtime DB, Redis, Supabase

Quality: Unit & integration testing, ESLint, Prettier, code reviews, defect analysis & root cause identification, secure coding

DevOps & Tools: Git, GitHub, Bitbucket, Azure DevOps Pipelines, CI/CD, AWS (EC2, Amplify), Azure Container Instances, Vercel, GCS, Agile/Scrum, Jira

Also: Flutter (mobile), Play Store & App Store release management

PROFESSIONAL EXPERIENCE

Full Stack Developer (Frontend Focus) — Contract Aug 2025 – Present
Botminds.ai — Enterprise Document Intelligence SaaS

- Built an enterprise-grade document editing UI in Angular + TypeScript, including a Word-like rich text editor — the platform's most technically complex frontend feature — using reusable, component-driven architecture.
- Integrated C# REST APIs into the frontend, handling response mapping, loading states, error handling, validation and retry scenarios across document processing workflows.
- Implemented BMX file management with version control, enabling project migration across subscriptions with full configuration preservation.
- Accelerated feature delivery by 90%+ through AI-assisted development with Claude and the Antigravity IDE, cutting complex issue resolution from days to hours.

Full Stack Developer (React / Next.js) — Contract Jul 2024 – Jul 2025
IVAM Global Solutions — Multi-client Product Engineering

- OpsVerse:** Designed and built a real-time AI-powered deployment assistant and chat interface in React.js, using hooks and centralised state management to handle streaming responses, reducing troubleshooting time for DevOps teams.
- KriyaLearn:** Developed an admin console and student learning portal in Next.js + TypeScript, delivering dashboard analytics, progress tracking and reusable UI components within an agile team.
- PlanB Consulting:** Migrated legacy SharePoint content into modern React applications; built interactive D3.js visualisations and integrated Azure Container Instances with CosmosDB-backed REST APIs.
- Consumed secured REST APIs (token-based auth) across all three products; maintained code quality with reviews, linting standards and Azure DevOps CI/CD pipelines.

Full Stack Developer Dec 2023 – Jul 2024
Soulocal Technologies — E-commerce & Retail Platform

- Sole frontend developer for a Next.js billing web application and 3 companion mobile apps — owning the entire UI/UX and component architecture.
- Designed and built the billing backend (FastAPI + MongoDB) on AWS EC2 and Amplify for real-time order processing, owning API contracts end to end from server to UI.
- Integrated Razorpay payments, Firebase Realtime DB for live updates and CleverTap for funnel analytics, heatmaps and crash reporting.

Software Development Engineer II Aug 2021 – Nov 2023
Sporfy India Pvt. Ltd. — Sports Technology

- Engineered 10+ live scoring platforms (cricket, football, badminton) using Next.js, React, Firebase and Google Maps APIs — serving thousands of concurrent users with real-time updates.
- Optimised web performance and responsiveness under high-concurrency live-match load, improving render times and reducing client-side crashes.
- Led a 3-member pod: sprint planning, code reviews, deployment pipelines and production monitoring across web and mobile.
- Awarded Quarterly Performance Award and promoted to SDE-II for exceeding delivery targets and mentoring junior developers.

KEY PROJECT

Story-to-Video AI Pipeline Personal Project

- Built an end-to-end automation pipeline — Gemma 3 (story generation), Kokoro TTS (voiceover), Whisper (timed subtitles), Stable Diffusion (visuals), MoviePy (composition) — exposed as REST services on FastAPI.
- Scheduled automation publishes to YouTube via GCS and the YouTube Data API, fully hands-free after trigger. Live channel: youtube.com/@RiseupNarratives

EDUCATION

B.Tech, Information Technology Jun 2018 – Jun 2022
Dr. N.G.P. Institute of Technology, Coimbatore
